

Material : How to work out the chords
to a song on the piano
YT video [25 mins] [November 2016]
Bill Helton.

~~Prerequisite~~

Prerequisite : Basic knowledge of music theory
~~like~~ like for eg : which key is D minor,
B sharp, Eb. Just the basics.

Step 1 : Workout the song's key.

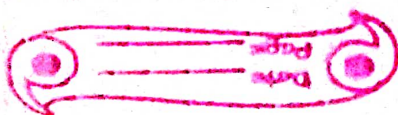

look at the note that the melody
finishes on, that note will always
be the tonic, which is the note
the key is named after.

A melody section can be split into
3 types - chord notes

passing notes

anticipation & suspension notes

in a 4-beat-bar (i.e 1, 2, 3, 4, 1, 2, 3, 4, ...)
 the chord notes mostly occur on ON Beat (1, 3)
 and passing notes mostly occur on OFF Beats (2, 4)
